INTRODUCTION

Strategy Mapper's Pardot Automation feature allows you to set up Drip campaigns in Pardot using Strategy Mapper's Actionable Intelligence, giving you accurate and relevant intelligence to nurture those valuable leads and opportunities you need to close.

This manual will guide you through the basics of how to integrate Pardot and Strategy Mapper.

SALESFORCE INSTALLATION

Add the Pardot App to your Salesforce Org

- Use the link below to guide you through this process.

<http://help.pardot.com/customer/en/portal/articles/2213578-pardot-appexchange-package-download-and-release-history>

Update the Lead and Opportunity Layout

- Make sure the PardotAutomation field is on your lead and opportunity layout while testing. After you are sure everything is working fine, you will probably want to remove this field so that it is not manually edited.

Status	Working

CONNECTOR CONFIGURATION

Connect your Salesforce connector in Pardot

- Use the link and example below to guide you through this process.

[Home](#) / Administration

Connectors

 The following LinkedIn Social Posting connectors must be re-verified before messages can post: Joseph Dindinger.

[+ Add Connector](#)

Customize the Pardot/Salesforce Connector

- Check the box that allows you to auto import Leads and Contacts into Pardot from Salesforce. If you choose not to automate Leads or Contacts then you'll need to 1) add them manually using the “Send to Pardot” button or 2) import them.

Customize Connector Preferences

Automatically create prospects in Pardot if they are created as a Lead or Contact in salesforce.com

Default Campaign

High rep turnover - losing deals ⌵

SALESFORCE CONFIGURATION

Adding an Actionable Intelligence PardotLink

Strategy Mapper needs to be configured with the pieces of Actionable Intelligence that you will want to send to Pardot. Here is how you do that:

- 1) From within Salesforce, click on the "All Tabs" link and choose the "PardotLinks" tab.
- 2) Press the "New" button and select one piece of Actionable Intelligence at a time that you want to configure, as in the screenshot below. (Only Pain Points, Strengths, and Customer Initiatives are supported at this time.)

The screenshot displays the configuration interface for adding an Actionable Intelligence PardotLink. At the top, there are three buttons: "Save", "Save & New", and "Cancel". Below this is a red header bar labeled "INFORMATION". The form contains the following fields:

- Actionable Intelligence Type: Pain Points
- Actionable Intelligence Value: Not collecting KPIs
- Industry Filter (Optional): --None--
- Account Type (Optional): --None--
- Product (Optional): GenWatt Propane 1500kW
- Country (Optional): United States
- State (Optional): A list of states is shown, with "Mississippi" selected. The list includes Missouri, Montana, North Carolina, North Dakota, Nebraska, and Mississippi.
- Only My Opportunities:

At the bottom of the form, there are three buttons: "Save", "Save & New", and "Cancel".

Sending Actionable Intelligence to Pardot

Going forward, when you are entering supported Actionable Intelligence, you will see a checkbox that allows you to add the current record into the Pardot Automation. If you uncheck the Pardot? checkbox, you can add a piece of Actionable Intelligence without notifying the Pardot Automation.

PARDOT CONFIGURATION

Create a custom Lead and Opportunity field in Pardot

- Use the example below to create your custom Lead and Opportunity field (TextArea) named PardotAutomation in Pardot

Name	Type	CRM Field	Updated At
PardotAutomation	Textarea	PardotAutomation__c	Apr 6, 2016 2:09 PM

Edit Custom Field

Name *

Type *

Custom Field ID * PardotAutomation

salesforce.com Field Name

Keep this field's type and possible values (for dropdowns, radio buttons, checkboxes) in sync with the CRM.

Required

Record and display multiple responses (useful for fields that are set to always be displayed like reporting issues)

Use pre-defined values (for checkboxes, radio buttons, drop downs, and multi-selects)

http://help.pardot.com/customer/en/portal/articles/2125853-creating-custom-fields?b_id=11139

Create a Campaign

- These campaigns will be associated with Actionable Intelligence (Pain Points, Strengths, Customer Initiatives) in Strategy Mapper

<http://help.pardot.com/customer/portal/articles/2125816-creating-campaigns>

Create a Segmentation List

- You will create Segmentation Lists for each piece of Actionable Intelligence (Pain Points, Strengths, Customer Initiatives) you'd like to automate emails for.

http://help.pardot.com/customer/en/portal/articles/2128397-creating-lists?b_id=11139

- Below is an example of Actionable Intelligence such as “High rep turnover – losing deals” which is an option under Pain Points.

List Information

Name *

Folder *

Tags

Email Test List
Email Test lists are exclusively used for internal tests, and will be limited to 100 prospects.

Archive Date
Archive Date is only used for sorting and doesn't affect module usage

Public list
Display this list in the email preference center

CRM Visible
Allow prospects to be assigned to this list from a CRM

Create your Automation Rule

- This rule will pull your Leads and Opportunities Actionable Intelligence into the proper Segmentation List. You'll create a rule for each Actionable Intelligence.

http://help.pardot.com/customer/en/portal/articles/2128566-creating-automation-rules?b_id=11139

Example Rule Criteria:

Rules	
Relation group	Match prospects that have any opportunities with properties: Match all <ul style="list-style-type: none">• Prospect opportunity custom field: Prospect opportunity custom field PardotAutomation contains 'High rep turnover - losing deals'

Create a Drip Campaign

- You can also create a Drip Campaign for each piece of Actionable Intelligence.

http://help.pardot.com/customer/en/portal/articles/2133407-creating-drip-programs?b_id=11139
